Dear Prospective Client,

As a long-time admirer of the entrepreneurial spirit and the competitive nature of the Free Enterprise system we the owners of TPSF Limited Liability Corporation are providing this informational letter and inquiry to you for consideration in the near future for a business relationship. As business owners we would like to meet with you in the future to discuss any benefit(s) envisioned by contracting with TPSF LLC as a security team for your establishment. TPSF LLC 's primary target market are clients with a need to secure their assets, neighborhoods and communities.

OBJECTIVE: Our board members and executives will bring a variety of Law Enforcement and Security Enforcement methodology and experience. We have fresh ideas and a creative start up team of executives and board members. We want our prospective client to be aware that retaining TPSF LLC for security and safety needs is the next best thing to hiring a team of full time professionally trained police officers. TPSF wants to establish a reputation that will attract residents, businesses and promote community optimism, family safety and area specific economic growth. TPSF envisions having a direct and positive impact on the safety, security and quality of life issues.

COST: We realize that many residents *will cringe* at the thought of having their association dues raised. Many of whom have witnessed the impact of neighbors who were victimized and the traumatic emotional and financial pressures visited on their families. Let's face it, in this current recession and global economic collapse the rift between the haves and the have nots is widening. Whether we admit this to ourselves or not we see it every day. We witness increasing sex offenses, burglaries, theft and the increasing thug population in our malls, movie theatres or neighborhoods. Our initial estimated cost will be approximately \$80.00 - \$90.00 a month per family - that is about \$960.00 to \$1,080.00 annually.

BENEFITS: Our business will generate tax revenue - real estate and employees, increase property value, lower insurance premiums, improve quality of life for client - HOA residential communities, estate owners and business zone members. In this depressed economy *change* is necessary and TPSF LLC can assist one neighborhood at a time to make that change. Additionally, as a new business venture TPSF LLC envisions a potential to generate rapid growth in revenue, profitability, and stakeholder value. We believe that this business paradigm can cause an inflection point in demand -- by introducing this new high value unique security service, reshaping the status quo and capturing industry leadership.

Sincerely,

Clyde Knight Jr.,
Founder TPSF LLC
